

Press Release
The Association of Alberta Public Charter Schools

February 24, 2022

The Association of Public Charter Schools is issuing the following statement with respect to the Alberta Government's *Budget 2022*:

"Engagement and choice are hallmarks of Alberta's greatest educational successes. For over 25 years, TAAPCS students, families, teachers, leaders and educational partners are proud to have reliably contributed to serving Albertan public education requirements for meaningful educational choice and engagement.

With this budget, against relentless challenge, the Alberta government continues to deliver on its promises. This budget will support education in Alberta and facilitate responsible expansion of public charter school education, by recognizing the need for fair access to capital funding.

Alberta's public charter schools strongly support the vision of collegiate programming and look forward to engaging new partners to focus on optimal learning, deliver distinctive programming, and support innovation that helps students move effectively to post-secondary education.

We are grateful for the Alberta government's ongoing support. The commitment to fund access to facilities meeting Alberta's high standards for effective learning environments will directly benefit student learning and serve our families on par with all other public schools."

Ron Koper, Board Chair, TAAPCS
